

Mario Gerges Issa

Web Developer | Backend Developer

Phone : 01285948011 Github: mario-girges85

Email : mario85.girges@gmail.com LinkedIn: mario-gerges-issa-017448314

Address: Haram St, Giza

OBJECTIVE :

Full Stack Developer specializing in React and Node.js, passionate about building scalable web applications and secure APIs. Seeking to contribute to real-world products while growing within a high-performance engineering team

EDUCATION :

- **Fayoum University — B.Sc. Computer Science & AI**
2023 - 2027
current GPA : 3.1
- **Digital Egypt Pioneers Initiative (DEPI) | April 2024- December 2024**
track: React Web development
evaluation: 83%

EXPERIENCE :

Freelance Full Stack Developer
2024 – Present

APPLIED PROJECTS :

1- Deacons School — Church School Management Platform ([Link](#))

Description

Full-stack web application designed to digitize and streamline church school operations, enabling administrators and teachers to manage students, curricula, and schedules efficiently.

Key Contributions

- Built a role-based management system for **admins, teachers, and students**.
- Developed secure authentication & authorization using **JWT**.
- Implemented curriculum and hymn uploads with protected file handling.
- Created bulk student import functionality to automate onboarding.
- Designed class & event scheduling modules for operational planning.
- Delivered fully responsive UI supporting **Coptic language content**.
- Integrated secure file uploads using **Multer**.

Tech Stack

React (Vite), Node.js, Express.js, MySQL, Sequelize, Tailwind CSS, JWT, REST APIs

2-Dragon — Order Management & Reporting System ([Link](#))

Description

Full-stack order tracking and analytics platform enabling businesses to manage, filter, and export customer orders with reporting capabilities.

Key Contributions

- Built responsive frontend dashboards using React (Vite) and implemented seamless navigation with React Router.
- Developed RESTful APIs for order creation, updates, and retrieval with advanced filtering (date, status, customer).
- Implemented secure authentication, protected routes, and role-based access using JWT & bcrypt.
- Designed relational database models using MySQL & Sequelize ORM.
- Generated exportable PDF reports (jsPDF / html2pdf.js) and handled file uploads & image processing via Multer & Sharp.

Tech Stack

JavaScript, React, Node.js, Express.js, MySQL, Sequelize, Tailwind CSS, JWT, Vite, Axios, jsPDF, Git

TECHNICAL CERTIFICATES :

- **DEPI | 2024**

Ministry of communications and information technology

- **OOP With C++ | 2024**

Mahara tech

TECHNICAL SKILLS :

Languages

- JavaScript, Python, C++

Frontend

- React.js, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend

- Node.js, Express.js

Databases

- MySQL, MongoDB, SQLite

DevOps & Tools

- Docker, nginx, Git, GitHub, CI/CD

Other

- REST APIs, JWT Auth, Multer, Sequelize, Bash, Linux

Languages :

- **Arabic**
Native
- **English**
Intermediate (conversational)
